

AI-Augmented ITSM Workflow

Triage → Propose → Approve → Dispatch → Audit

1. INTAKE

Outlook email

Teams chat / @bot

Service Portal

Voice / phone → ticket logged

↓ Ticket created in SharePoint Tickets list

2. AI TRIAGE (read-only)

Triage Agent

Classify · Categorise · Link CI · Match KB · Suggest assignee · Detect major incident

Read-only tools

SearchKB · LookupCMDB · LookupUser · MatchProblem ·
GetSimilarTickets · ProposeResolution

3. DECISION & APPROVAL (human-in-the-loop)

Proposed action +
confidence + risk

Confidence & risk?

WRITE action
(needs gate)

Approval Gate

Stages from Approval Policy:
Manager → IT Owner → CAB
(All Required / Any One / Majority)

Route to human queue
(no AI write)

4. DISPATCH (single HTTP endpoint, scoped service principals, idempotency)

Provisioning Jobs list

audit + queue

enqueue

POST /provisioning/jobs (single HTTP dispatcher)

payload: { jobType, targetUser, args, idempotencyKey, authorizedByApproval }

Validate:

· Approval ✓
· Idempotent ✓

↓ Route by jobType (switch) — fan-out to specialised flows

5. EXECUTION (specialised flows, scoped per category — only the most common shown)

IDENTITY & LIFECYCLE

SP-IT-Identity · Graph: User.ReadWrite.All

- Create user / Disable / Re-enable
- Reset password / force change
- Reset MFA / register methods
- Update profile (title, manager, dept)

GROUP MEMBERSHIP

SP-IT-Groups · Graph: Group.ReadWrite.All

- Add / remove from security group
- Add / remove from M365 group
- Add / remove from distribution list
- Dynamic group rule update

LICENSING

SP-IT-Licensing · Graph: Directory.ReadWrite

- Assign / revoke license (E3, E5)
- Move user between SKUs
- Suspend during leave
- Reclaim from disabled accounts

EXCHANGE / MAIL

SP-IT-Exchange · Exchange Online + Graph

- Create / share mailbox
- Grant Full-Access / Send-As
- Add calendar permission / delegate
- Increase mailbox quota
- Set out-of-office on behalf

SHAREPOINT / ONEDRIVE

SP-IT-SharePoint · Sites.FullControl.All (scoped)

- Provision new site / library
- Grant / revoke site access
- Add / remove from SP group
- Folder-level permission grant
- Restore deleted file from bin
- Transfer OneDrive to manager

TEAMS / ENDPOINT / SOFTWARE

SP-IT-Teams · SP-IT-Intune

- Add to team / create channel
- Apply Teams policy
- Wipe / retire device (Intune)
- Retrieve BitLocker key
- Push application install
- VPN / Wi-Fi cert provision

Each card = one specialised flow per action, behind one scoped service principal. New job types are added by registering a new flow + extending the dispatcher switch.

6. AUDIT & NOTIFY

Update Provisioning Jobs

Status: Succeeded / Failed / Compensated
ResultJSON · CompletedAt
ServicePrincipal trace

Update Ticket

Status → Resolved / Closed
WorkNotes (audit trail)
Close code + resolution notes

Notify Caller

Email / Teams notification
+ feedback survey link
+ KB article reference
